About Me

I'm a front-end and mobile app developer with a passion for blending creativity and functionality to build responsive, intuitive, and engaging digital experiences. I strive to go beyond meeting user expectations aiming to elevate them. Constantly curious, I'm always exploring new technologies and seeking challenges that push the boundaries of modern software development.

Expertise

Mobile & Front-End Development :

- React Native
- Expo
- React
- React Router
- Redux
- AsyncStorage
- MUI
- Axios
- REST APIs

Languages & Markup:

- JavaScript (JS)
- TypeScript (TS)
- HTML5
- CSS3

Tools & Environment:

- Vite
- NPM
- Git,
- Visual Studio Code
- Linux
- Git Workflows
- Canva

Language

- English (Fluent)
- Persian (Native)

Education

2024 - now Tehran Bachelor

IAU science and research branch / bachelor of engineering - aerospace

some of the

Experiences & Projects

Nerkh

React Native, axios, Context Provider, async-storage, restAPI and more

Nerkh is a React Native/Expo mobile app that fetches real-time currency and gold prices from the BRS API. It features search, sorting, pull-to-refresh, dark/light theme management, multi-page navigation with Context providers, and persistent storage via AsyncStorage—demonstrating expertise in mobile development and state management.

Watch shop

React, MUI, Ract Dom,

Watch Shop is an e-commerce prototype for watches, featuring curated browsing, cart functionality, and mock checkout and cross-page state management.

Cryptopia

React, MUI, Ract Dom, axios, restAPI

Cryptopia is a React.js app using the CoinGecko API to deliver real-time crypto prices and market trends in a responsive UI, showcasing hooks-based state management and dynamic data handling.
