Portfolio

About Me

I'm a frontend developer who loves building fast, clean, and user-friendly web experiences.

As the co-founder and frontend lead of *LibMate*, an AI-powered book translation platform, I've worked hands-on with real production environments and modern web tools.

I care deeply about great design, smooth interactions, and writing code that actually feels good to maintain.

Skills

Frontend & Backend: HTML5, CSS3, JavaScript (ES6+), TypeScript, React, Redux, React Router, TailwindCSS, MUI, Emotion, Axios, Vite, Node.js, Express.js, REST APIs

Tools: Git, Docker, GitHub Workflows (CI/CD), NPM, Visual Studio Code, Linux, Version Control, Canva

English: Fluent | Persian: Native

Experiences & Projects

LibMate | Co-founder & Frontend Developer
React, MUI, Emotion, Axios, Vite, Docker, GitHub Actions, YAML

An AI-powered platform for translating books. Built the entire frontend from scratch with a clean UI, advanced state management, and smooth animations with anime.js and Swiper.

Handled deployment pipelines using Docker and GitHub Workflows, ensuring reliable and automated production builds.

libmate.ir

Watch shop | Frontend Developer / Project
React, Axios, MUI, Emotion, React Router, YAML

An elegant e-commerce website for luxury watches. I focused on UX and data management, crafting a sleek, intuitive shopping experience with responsive design and smooth navigation.

LiveDemo | GitHub

Cryptopia | Frontend Developer / Project
React, Vite, Axios, React Router, YAML

A live crypto-tracking website displaying real-time prices of the top 30 cryptocurrencies. Built with responsive design, and deployed to GitHub Pages.
